U.S. DEBT TOPS \$10 TRILLION: GOLD COULD SKYROCKET

The potential for more bank failures, volatile stock markets, and an ongoing economic recession, continue to worry people everywhere. When you add to the equation more than 11 million unemployed Americans and an insurmountable debt that tops \$10 trillion, it is easy to see how hard it can be to maintain financial security. There is, however, good news. As predicted, the Gold Market could be well on its way towards the \$3,000 an ounce mark. Now, more than ever, it is crucial that individuals act quickly to move paper assets into Gold. Do not be left behind while others gain from this market. Act now so you don't have any regrets later.

GOLD IS BETTER THAN MONEY IN THE BANK

If you had \$50,000 in the bank and you transferred it into Gold at today's price, you could now have an opportunity to possibly gain as much as three times its value. That's right, \$150,000. On the other hand, if you leave that same \$50,000 in the bank for 10 years, chances are, it's only going to be worth about \$50,000. Unfortunate... but true. You must understand that when you convert money to Gold, you haven't spent your money, but have transferred its value from a declining paper currency, to a precious metal that is rising in both market and numismatic value. The Gold Market is currently very explosive, and with predictions of its price rising from about \$1,000 an ounce to \$3,000 an ounce in the future, now could be a great time to get in. No one, including the United States Rare Coin and Bullion Reserve, can guarantee if a Gold Coin's future value will go up or down.
