

WARNING

There are 57 drugs found in your bottled water, tap water, well water, and spring water
—AP investigation 3/10/08

Cancer Answer?

“A vast array of pharmaceuticals — including antibiotics, anti-convulsants, mood stabilizers and sex hormones — have been found in the drinking water supplies of at least 41 million Americans,” in one area alone, an Associated Press investigation shows.

The New York state health department and the USGS tested the source of the city's water upstate. They found trace concentrations of heart medicine, infection fighters, estrogen, anti-convulsants, a mood stabilizer and a tranquilizer.

What Happens to Me When I Drink This?

Pharmaceutical pioneer and founder of the American Cancer Society, Elmer Bobst once said, **“Millions of people will get cancer as soon as a mixture of drugs get into our drinking water.”** That is exactly what happened. (AP article 3/10/08) The mixture of 57 drugs that are flushed into our ground water aquifers are now found in our spring water, bottled water, tap water, and well water and they have spread to our municipal water systems causing all kinds of problems. (Associated Press 3/10/08) They were right. This deadly mixture over time affects the immune system, causing chronic obesity (68% of the population), causing heart attacks, ED, weakness, and a lack of energy including the aberrant behavior we have never seen before.

How Do the Drugs Get Into the Water?

“People take pills. Their bodies absorb some of the medication, but the rest of it passes through and is flushed down the toilet. The wastewater is treated before it is discharged into reservoirs,

rivers or lakes. Then, some of the water is cleansed again at drinking water treatment plants and piped to consumers. But most treatments do not remove all drug residue.”

City water officials declined repeated requests for an interview. In a statement, they insisted that “New York City's drinking water continues to meet all federal and state regulations regarding drinking water quality in the watershed and the distribution system” — regulations that do not address trace pharmaceuticals.” - AP article

Ordinary Water Purifiers Don't Work

The problem with today's distillers, filters, ozonators, reverse osmosis, and alkaline pH water machines is that they don't process the water long enough to destroy the viruses and bacteria on the virus and bacteria destruction chart. Each one has a different destruction time. They are so potent they can kill you.

On top of that, standard water tests don't tell you what's in your water. **Ordinary water filter/distillers spread diseases of former users of your tap water and don't actually purify anything.**

The Cure for Cancer?

In 1930, Otto Warburg, M.D., already renowned for his research on respiratory enzymes discovered that cancer cells cannot survive in an oxygen-rich environment and that high oxygen levels might eradicate these dangerous cells before they could kill healthy cells. His experiments check out, proving that cancer cells cannot exist in oxidized, healthy tissue. In 1931 he was awarded the Nobel Prize for Medicine.

Hence, both the preventive method and the cure for cancer have been known for 80 years now. Warburg stated that, as the first priority of treatment, “all growing body cells must be saturated with oxygen,” and the second priority was to avoid further exposure to toxins. While admitting that there are many causes of cancer, he said there is only one prime cause and that is the lack of oxygen at the cellular level.

Truly Pure Water

When I heard this news in the 60's I thought, “Who would know better than Elmer Bobst, founder of Warner Lambert (Lipitor) now Pfizer, and The American Cancer Society? Bobst told me, “The only home water purification product that will work must 1) change the properties of water and 2) subject water to intense ultraviolet radiation and heat 100's of times per gallon” (not just once!)

Taking this information, I started putting my engineering degree to work and began building a water purifier powerful enough to kill bacteria and cancer cells.

World Changing Discovery

I am an 80 year old engineer and inventor. When I was in engineering school text book science said you couldn't increase the solubility of water (hydrogen bond angle) and some people still believe that. However, using Nobel Prize Winner Otto Warburg's research, we discovered how to get more blood oxygen into the blood stream.

Like Otto Warburg said, “Cancer cells can't survive in high blood oxygen,” That's the key. We discovered how to get more oxygen into the blood stream by increasing the solubility of water. When you increase the solubility of water, blood flow increases and your blood can absorb more oxygen coming into your lungs. Simply oxygenating water doesn't get oxygen into the blood stream.

Testimonials

“Yes, it is for real. My wife has ovarian cancer. In my wife's case, she started drinking John Ellis Water and when they operated on her, the cancer (still identifiable as cancer) was reduced to a sandy granular substance that does not attack flesh (which is how cancer kills). Her CA125 is still elevated, but the cancer is not doing anything. Because she has chronic pancreatitis, her immune system is already gone, which means chemo or radiation would kill her. She had the surgery about three years ago. Her condition has not changed.” -bruce@.....com

“Since I bought my 3 liter bottle last December I feel so different - Have more energy and less aches and pains in my body. I am 81 years young now. (82 in April) Feb 2008 I went off all (about 15) drugs I was taking - What a difference that made in my body! Now even my oldest son went off all his drugs too - He will be 58 in March! Thanks a million!” G. S. Appleton, WI

“I had seen the ads for John Ellis Water in Mother Earth News a couple of years ago, but could not afford the machine. Great fortune for all, they made it available in corked, glass bottles. It was the only thing I was using, and my meningitis was cured. I subsequently developed cervical cancer, which is also being strongly addressed by John Ellis Water. It goes right to the ailment, whatever it is. I had to leave my employment when I contracted meningitis, and subsequently lost my health insurance. I do not know if all of the cancer is gone, but I went from daily, horrendous pain (which was rapidly spreading), to no pain at all.”

“BTW: I bought one several months ago and YES as the Inventor claims, it does everything and then some ... There are many uses for the water this machine produces ... Like it kills a virus in a heart beat ... and the health of our baby ... perfect water ... plants grow bigger ... coffee tastes better ... my health has improved 100% since drinking the water ... so my advice is to listen to someone that has one of these machines and DO NOT listen to somebody that tells you what they think, knowing that they have not used one ...” DR
“In October of 2006, I was diagnosed

with asbestosis, and had constant pain in my whole chest cavity. COPD was also diagnosed, both from working almost 20 years in Boiler Plants. My doctor had me on a Compressor/Nebulizer, using Albuterol Sulfate Inhalation solution to help my breathing. But unfortunately it did not help with the inflammation in my chest cavity. I thought I would try your water, instead of the Albuterol Sulfate. The results were immediate and miraculous. I was seeing a Pulmonary Specialist for the COPD/Asbestosis on 6 month intervals and I told him what I was doing at the end of one of my visits and he just looked at me and walked out of the room. Six months later when I went to see him, I told him again that I had stopped using the Albuterol Sulfate and was just using the John Ellis water (about 3-4 cc), he listened to my chest. He said my chest was completely clear and to keep doing what I was doing. He also said I would have to see him once a year now.” Daryl Cook

“I have been drinking electron 4 water for about 9 months. The grey hair that was starting to spread is now almost totally gone. I have been through some fairly severe detoxing but that seems now to be over. My energy levels have never been better and some of those nagging, ongoing illnesses seem to have totally gone. I drink about three litres per day and now I find myself in a panic when I travel overseas for work and cannot take my water. I cannot see myself drinking anything else, ever.”
Andrew 43, Australia

About John Ellis...

The 82 year old inventor is a Choate School and Lafayette College Engineering graduate. At just 17 years old, he invented a scientific measuring device that is still used worldwide. After working as an Oil Well Engineer, a Design Engineer at Douglas Aerospace and Honeywell Engineer, he started his own business at age 30 and invented a switch that operates (on-off) within .0001 of an inch.

Honeywell and Military/Industrial users say, “He's the only person that knows how to produce it!” Likewise, textbook science claims: “You can't change water properties” but John Ellis HAS changed the properties of water for the benefit of mankind!
