SUDOKU

Fill in the boxes using numbers between 1 and 9 so that each column, each row, and each 3x3 square contain all nine numbers only once.

1								7
	6		8		1		3

	3		5		2		9	
2								5
	9		7	8	6		1	
		1				4		

KAKURO

Kakuro puzzles are like crosswords that use numbers instead of words. The goal is to fill the blank squares associated with a clue (called a "run") with the numbers 1-9 so that the numbers add up to the corresponding clues. Like Sudoku, digits in a run cannot repeat. When the grid is filled, the puzzle is complete.

RULES

- Each row and each column must contain the numbers 1 through 4 (easy) or 1 through 6 (challenging) without repeating.
- The numbers within the heavily outlined boxes, called cages, must combine using the given operation (in any order) to produce the target numbers in the top-left corners.
- Freebies: Fill in single-box cages with the number in the top-left corner.
